

EVOLUZIONE V2

Features taken directly from our commercial espresso machine range give the Evoluzione machines superior technology that is normally only found in full sized commercial espresso machines.

All Rocket Espresso machines use our insulated boilers, the Evoluzione couples this with a commercial grade pressure stat and utilises our 9mm boiler end plates for increased thermal stability.

The use of a rotary pump ensures quiet yet robust pump performance and allows the user to have the machine draw water from the internal machine reservoir or alternatively connect the machine directly to the water supply.

The Evoluzione machines are offered in two different body styles, the Giotto or the Cellini.

EVOLUZIONE V2 FEATURES

- Heat exchanger boiler design
- Commercial pressurestat
- Boiler capacity: 1.80 litres
- Full sized commercial rotary pump
- 2.9 litre water reservoir or direct water connection option
- Wattage: 1200 W
- Dimensions: 340 x 425 x 380 mm (width x depth x height)
- Weight: 27.8 kg
